Application No. 09/841 4 Reply to Office Action of February 17, 2004

IN THE SPECIFICATION

Please replace the paragraph beginning at page 3, line 25, and ending on page 4, line 10, with the following rewritten paragraph:

According to another aspect of the present invention, a door for refrigerator is composed of a door panel made of metal, an inner panel combined with the door panel, a door cap fitting into the door panel and the inner panel in an upper portion, and a handle fitting into the door panel and the inner panel in a bottom portion. Furthermore, the door for refrigerator has a heat insulating foam material injected inside. Then, the door for refrigerator includes draw forming provided at a given position of the door panel. The door panel may have a two-tone color, and the draw forming may be provided on a boundary of colors.
